METEC Accessories

METEC accessories are manufactured of high-quality, stainless chrome-nickel (Cr-Ni) steel. Its highly polished bronze mirror look is achieved through mechanical polishing using special tools and pastes. We do construct our products based entirely on a certain vehicle. Observing its shape.

Front bars

- * The front bar is fastened on strong body elements of a car – a stable and vibration free fastening.
- * Enables stable installation of additional lighting – the light shaft does not “jump”.
- * A deformation gap between the product and bumper – in case of minor impacts the bumper remains undamaged.
- * Cost-effective and quick replacement of connection elements after an accident.

818700 EuroBar, ø70mm, with EU type approval

818710 A-bar. ø60mm

818715 Lampholder bar with, ø48mm

818705- V-Klasse, 818709 - Vito, Citybar with LED, ø60mm

Side Bars & VAN TOUR running boards

The sidebar serie using a novel mounting system is called BRACE-IT. Welded connections are replaced with even more solid brackets and bolted joints. Upon a side collision with an object, sidebars absorb the initial impact and reduce its strength, preventing damage to the side shell of a vehicle. VAN TOUR sideboards having multifunctional solution – just the right number of steps for your car.

888731-L2 / 888737-L3 Side protection bars BRACE-iT, ø60mm, mount. kit 818730 needed

888733 - L2 / 888739 - L3 Sidebars 'BRACE-IT', ø 60 mm, LED

818735 Sideboard step TOUR, ø48mm, L2

888600 Sideboard VAN TOUR, 48mm, front door, mount kit 818788

888601 Sideboard VAN TOUR, 48mm, side door, mount kit 818789

- Reduces the risk of injuries

818760 Prot. plate, rear bumper, 818419 step

818750 Rear corner bumper, ø60 mm, L2 / L3

618020 Towing hitch

Roof railings, skid plate, lamp holder for working lights

Durable and lightweight aluminum alloy used. Novel and functional railings fit together with universal support legs of the major manufacturers of roof holders.

818770- L2 / 818771- L3 Roof railing, ø42mm

818720 Skid plate, AL

888498 Lamp holder for working lights, mount. kit 818799

The quality we share...

FOR THE BETTER SAFETY OF DRIVERS AND OTHER ROAD USERS

- Reduce the extent of injuries that pedestrians and cyclists may suffer upon collision.
- Reduce the risk of injuries to the driver upon running off the road or a vehicle-wildlife collision.
- Reduce the risk of an injury when slipping or straining occurs upon entering or exiting a vehicle or during loading.
- Minimise damage to a vehicle upon a minor collision, resulting in smaller repair costs.
- Additional lighting installed to the sidebars of a vehicle improves visibility in dark conditions and minimises the risk of getting into an accident.

TOP DESIGN

- All products for a certain model are designed by the same team.
- We value aesthetic appearance over the benefit that could be gained from product standardisation.
- A set of accessories installed to a vehicle results in a harmonious appearance.

MODERN R&D AND PRODUCTION

- Product development and production takes place in Tartu, Estonia.
- All base products are digitally equipped with original dimensions. 3D models and product blueprints are developed.
- Up-to-date equipment from Europe and Japan ensures high accuracy of manufacturing and reliable delivery.
- All this ensures the top-notch compatibility and smooth installation of base products.

TRADITION AND EXPERIENCE

- Also, for as long as 20 years our company has been producing private label vehicle accessories for leading European car manufacturers.
- In 2001, the quality management system of the company was issued the ISO 9001 certificate.
- Our sales and development team has years of experience in product development and active cooperation with clients.
